PROFESSIONAL SUMMARY

Full-Stack Web Developer with experience in Laravel, React, and MySQL, specializing in building scalable web applications, RESTful APIs, and database-driven systems. Experienced in freelance development, system leadership during internship, and deploying production-ready applications. Strong background in full software development lifecycle including design, development, testing, and deployment.

EDUCATION

Full-stack Web Development

Zuitt Tech Program | April 2026 – Expected September 2026

Bachelor of Science in Information Technology

National University Laguna | August 2022 – July 2026

Full-stack Web Development

KodeGo | February 2023 – August 2023

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Web Developer

Self-Employed | Remote

Jan 2023 – Present

- Engineered and deployed 10+ production-ready full-stack web applications for local clients, reducing manual data tracking for users by utilizing optimized Laravel and React architectures.
- Designed and integrated secure Role-Based Access Control (RBAC) systems and optimized RESTful APIs to ensure seamless front-end – back-end data communication.
- Architected relational database schemas and normalization workflows, leading client onboarding sessions to translate complex business requirements into technical specifications.

Intern – Full-Stack Developer (Project Lead)

Alpha Centauri Garments Corporation | Hybrid | Quezon City

Dec 2025 – April 2026

- Partnered directly with the IT Head to establish sprint goals, delegate technical tasks, and drive agile system planning across the development lifecycle.
- Spearheaded the end-to-end development of internal enterprise systems, engineering modular backend APIs and responsive user interfaces.
- Conducted code reviews and performance testing for internal enterprise modules to ensure optimal system stability.

Job Order Contractual

Philippine Rice Research Institute | On-site | Laguna

Nov 2022 – Feb 2023

- Performed data entry and document verification for government assistance programs.
- Organized printed and digital materials for distribution and reporting.
- Assisted in inventory and records management for office operations.

Deployment: Vercel, AWS, Render, Azure, Hostinger

Frontend: React, Vue.js, Next.js, Tailwind CSS, Bootstrap

Tools: Git, GitHub, Postman, Jira, Figma

Backend: Laravel, Node.js, Express.js

Concepts: REST APIs, MVC Architecture, Authentication, CI/CD,

Database: MySQL, PostgreSQL, MongoDB, Firebase

Responsive Design

RESEARCH & PUBLICATION

Development of a Delivery Application for Star Express Cargo

Co-Author | Springer Nature Conference Proceedings (Scopus-Indexed International Publication) | 2026

DOI: 10.1007/978-3-032-13153-9_22

Publication Link: [Springer Nature Chapter](#)

Scopus Record: [Scopus Publication Record](#)

CERTIFICATIONS & TRAINING

Salesforce Supported Virtual Internship Program (Philippines 2025)

SmartBridge Educational Services Pvt Ltd (Salesforce Partner) December 2025

IT Specialist – Network Security

Certiport (Pearson VUE) February 2025

PROJECTS

Shot & Cards

Tech Stack: React, Tailwind, Vercel

2026

Developed a web application that calculates card draw probabilities and tracks remaining cards in a deck in real time. Built a responsive interface using React and Tailwind CSS to provide a smooth experience across desktop and mobile devices.

Dspeed Cargo PH

Tech Stack: Laravel, React.js, Inertia.js, Tailwind CSS, MySQL

2025

Developed a company website and logistics platform for a cargo business using Laravel and React with Inertia.js. Implemented service information management, pricing displays, and responsive pages for desktop and mobile users.

Link: <https://dspeedcargoph.com/>

Pakil Laguna Tourism System

Tech Stack: Laravel, MySQL, Tailwind, QRCode

2025

Developed a tourism information system that allows visitors to access attraction details, participate in QR-code-based rewards, and interact with local businesses. Implemented vendor management and content administration features for tourism stakeholders.

Link: <https://pakiltourism.org>

City Hall Interactive Map

Tech Stack: Laravel, MySQL, SVG, Dijkstra's Algorithm

2024

Developed an interactive indoor navigation system that helps users locate offices and facilities inside a city hall building. Implemented Dijkstra's Algorithm to generate the shortest route and integrated SVG floor maps for navigation.
